

Our local area receives several different radio stations via FM translators, among them, KLOVE and KMBI. These radio stations provide positive life messages for many and if LPFM were activated and these stations no longer allowed to broadcast FM in our area, the positive and encouraging life changing messages would not be aired for the general populace to enjoy and consume. The wholesome, moral content encourages us and others in the area to live an upright, moral life, thus bettering the local community. Please do not make changes which would eliminate either of these stations from our broadcast area. They provide quality listening and our choices are limited as it is.

Thank you,
Richard J. Miller
